

HTTP Error 503.2 - Service Unavailable

The serverRuntime@appConcurrentRequestLimit setting is being exceeded.

Most likely causes:

- Setting is too low.
- The application is taking too long for the current load.

Things you can try:

- Try increasing the value of the setting.
- Check that external resources (for example, disk, database, etc..) are performing at expected levels.
- Check that the application has not deadlocked.

Detailed Error Information:

Module	IIS Web Core
Notification	BeginRequest
Handler	PageHandlerFactory-Integrated-4.0
Error Code	0x00000000

Requested URL	http://172.16.37.3:81/NRecoReports/InterimStatement.aspx?LetterSerial=5HLOy uw9fdoQuZg6fz%2bjdg%3d%3d
Physical Path	D:\Websites\ReportServices\NRecoReports\InterimStatement.aspx
Logon Method	Not yet determined
Logon User	Not yet determined

More Information:

IIS will not allow more concurrent requests to an application than the serverRuntime@appConcurrentRequestLimit setting permits.
